Located in a welcoming environment, the centre offers specialized therapies, assessments, and support services designed to help children thrive despite their unique sensory needs.

Understanding the Out of Sync Child and Sensory Processing Challenges

What Is the Out of Sync Child?

The phrase "out of sync child" refers to children who experience difficulty processing sensory information from their environment. These children may be hypersensitive or hyposensitive to stimuli such as light, sound, touch, taste, and movement. As a result, they often exhibit behaviors that are misunderstood or overlooked, including sensory overload, anxiety, difficulty focusing, or behavioral outbursts.

Common Signs of Sensory Processing Difficulties

Children with sensory processing challenges may display:

- Overreactivity to sensory stimuli (e.g., covering ears to noise)
- Underreactivity (e.g., seeking intense sensory input)
- Difficulty with coordination and motor skills
- Challenges with balance and spatial awareness
- Behavioral issues such as tantrums or withdrawal
- Difficulty with transitions or changes in routine

Understanding these signs is crucial in identifying children who may benefit from specialized support services offered at centres like the Joya Centre.
